Art Unit: 2614

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-40 and 49-55, drawn to signal formatting system, classified in class 348, subclass 469.
 - II. Claims 41-48, drawn to a conversion process applied to cinematic imagery, classified in class 348, subclass 441.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as initial generation of an image from initial raw input data that does not require reformatting (group II also specifically directed to cinematic video). See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, because of their recognized divergent subject matter, and because the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
